

LET'S COLLABORATE!

**Get your projects over the line faster with
our virtual design and markup service...**

**At Legrand we understand the need to keep projects moving even
if it is not possible to have a face to face meeting.**

That's why our Aid Call and Tynetec account managers are on hand to provide online support and assistance by collaborating online in real-time. We can mark up drawings and schematics, create new symbols for specific products, add logos and make amendments to existing plans.

As the UK number one supplier to the Assisted Living & Healthcare sector we can also provide virtual site surveys and supply online quotes and sign off for your nurse call, intercoms, pull cords, door entry system, as well as designs for assisted living and the connected home saving you time and adhering to current government guidelines.
